The members' site

The members' site, emc.ozwala.com (https://emc.ozwala.com), is where members ask questions, report bugs and ask for features, in its forum. You sign in there with your ozwala.com account (see Your ozwala.com account).

Open the forum from the app

The **Dashboard**'s Help links include **Forum** and **Report a bug**, and they open in your browser. To keep the forum, or a topic in it, beside your own links, add it as a bookmark (see Projects and bookmarks).

From the command line: `ozwala bookmark add "Members' forum" https://emc.ozwala.com/forum`, then `ozwala bookmark open "Members' forum"`.

Request a feature

On the forum, start a new topic in the **Feature request** category, saying what you would like Ozwala to do and why. Other members can reply to it, and you will see what becomes of it there.

More about Ozwala at ozwala.com (https://ozwala.com).
