

Getting Started (STUB)

Getting Started

STUB — TO BE REPLACED. This is placeholder content for the ozwala documentation site.

This page will eventually walk a new user through their first steps with Ozwala: creating an account, setting up a workspace, and running through a minimal end-to-end example.

What belongs here (eventually)

- A short “what is Ozwala” framing paragraph.
- Prerequisites (accounts, access, tooling).
- A first successful action, start to finish.
- Links to the next logical doc (Installation, Configuration).
