

Installation (STUB)

Installation

STUB — TO BE REPLACED. This is placeholder content for the ozwala documentation site.

This page will eventually cover how to install and provision whatever Ozwala requires locally or in a hosted environment: supported platforms, package/download links, and a verification step to confirm a successful install.

What belongs here (eventually)

- Supported operating systems / environments.
- Step-by-step install instructions per platform.
- A “verify it worked” smoke check.
- Common installation failures and fixes.
