

Automating a Review Workflow (STUB)

Automating a Review Workflow

STUB — TO BE REPLACED. This is placeholder content for the ozwala documentation site.

This page will eventually describe how to chain Ozwala steps together into a repeatable review workflow, including triggers, approval gates, and notifications.

What belongs here (eventually)

- Defining the stages of a review workflow.
- Wiring up triggers and approval gates.
- Notification and escalation options.
- A worked example end to end.
