

Building a Knowledge Base (STUB)

Building a Knowledge Base

STUB — TO BE REPLACED. This is placeholder content for the ozwala documentation site.

This page will eventually walk through structuring source material, importing it into Ozwala, and organizing it into a usable knowledge base.

What belongs here (eventually)

- Planning the structure of a knowledge base before importing content.
- Supported source formats and import workflow.
- Tagging, categorization, and search considerations.
- A worked example from raw source material to a browsable knowledge base.
