

Curating a Persona (STUB)

Curating a Persona

STUB — TO BE REPLACED. This is placeholder content for the ozwala documentation site.

This page will eventually cover how to define, refine, and maintain a persona within Ozwala, including the inputs that shape it and how to evaluate whether it behaves as intended.

What belongs here (eventually)

- What a “persona” is in Ozwala’s model and what it’s used for.
- Step-by-step persona creation and configuration.
- Iterating on a persona based on observed behavior.
- Common pitfalls when curating a persona.
